Summary

Graduate student in Artificial Intelligence with a 4.0 GPA, passionate about machine learning and committed to developing ethical, transparent, and human-centered AI systems.

Education

Worcester Polytechnic Institute

Jan 2025 – Dec 2026

MS in Artificial Intelligence

- GPA: 4.0/4.0 cumulative ([Transcript here](#) 🔗)

Projects Experience

Adversarial Attack via Knowledge Distillation

Jan 2025 – May 2025

Mentor: [Prof. Raha Moraffah](#) Paper: [here](#) 🔗

- Trained a student model via multi-teacher knowledge distillation to generate transferable adversarial examples, achieving 95% PGD success with 6× faster generation than ensemble baselines on CIFAR-10, to improve black-box attack efficiency

Microsoft Academic Graph Information Retrieval for Research Recommendation and Assistance

Sep 2025 – Dec 2025

Mentor: [Prof. Xiaozhong Liu](#) Paper: [here](#) 🔗

- Proposed Attention-Based Subgraph Retriever: a GNN-as-retriever model that uses attention pruning to pass a refined subgraph to an LLM for advanced knowledge reasoning.

Nepali Text to Speech Synthesis

July 2022 – May 2023

Mentor: [Suramya Sharma](#) Paper: [here](#) 🔗

- Developed Nepali Text-to-Speech (TTS) system by adapting pre-trained English Tacotron2 and WaveGlow models, achieving 3.09 average MOS, leading to improvement in pronunciation accuracy compared to baseline systems under low-resource conditions.

Industry Experience

AI & Automation Intern

Wakefield, MA

[TÜV SÜD America, Inc.](#)

Dec 22, 2025 – present

- Developed a production-grade chatbot with conversation history and file upload capabilities, leveraging LLM-based systems to enable intelligent, context-aware interactions.
- Built end-to-end data pipelines using Azure SQL Database, Azure Storage, and Azure AI services (Azure OpenAI, Cognitive Services, Document Intelligence) to automate compliance document processing and data extraction.
- Designed and implemented CI/CD pipelines to deploy applications across development, QA, and production environments using Azure App Services and cloud infrastructure.

AI Specialist (Part Time, On-Campus)

Worcester, MA

[Global Lab, Innovation Studio, WPI](#)

Sep 8, 2025 – present

- Develop an end-to-end interview simulation system powered by persona-driven AI and contextual knowledge integration to enable realistic, adaptive interview experiences.

Data Engineer

Lalitpur, Nepal

[Cedar Gate Technologies](#)

July 2023 – Dec 2024

- Onboarded healthcare datasets from multiple U.S.-based clients, ensuring data integrity and consistency across ingestion pipelines and contributed to the scalable ETL integration framework at Cedar Gate Technologies, a US-based healthcare analytics company with operations in Nepal.

Skills

- **Programming Languages:** Python, C#, C++; **ML/DL Frameworks:** TensorFlow, PyTorch, Keras, scikit-learn, Hugging Face, LangChain, LangGraph; **Databases & Storage:** SQL, Amazon S3; **Visualization:** Tableau, Power BI; **Cloud & DevOps:** Azure (App Services, Storage, SQL, Azure OpenAI), Azure DevOps; **Low-Code Platforms:** Microsoft Power Platform (Power Automate, Power Apps)
